

AccountAbility Charter

1

Our **Vision** is of a world where people have a say in the decisions that have an impact on them, and where organisations act on and are transparent about the issues that matter.

2

Our **Mission** is to promote accountability innovations for sustainable development.

3

Our **Values** are rooted in *meaningful accountability to our stakeholders*, through which we embrace inclusivity, diversity and integrity.

4

Our **Commitment to Accountability** is expressed in the AA1000 Principles of Inclusivity, Materiality and Responsiveness, which underpin our practice of:

- Engaging with stakeholders to understand their expectations about our governance, policies, strategies, practices and performance.
- Transparently accounting to stakeholders on our performance on the issues that matter to them.
- Developing innovative and sustainable responses to issues that matter.

5

Living our Commitment is ensured by our:

- **Council**, made up of those who represent our stakeholders' interests and contribute to our success.
- **AccountAbility Forum**, an annual convening of partners, members, associates and core team together with our Council to review and provide guidance on future plans and activities.
- **AccountAbility Accounts**, our annual report to stakeholders developed with the AccountAbility Forum and owned by the Council.
